## Frontend Developer (junior)

### About me:

As a former event planner, I love challenges - and frontend development sounds like a great one.

Event planning experience made me a team player, taught me to work under strict deadlines and search for unexpected solutions. And I feel that these skills should help me become an outstanding frontend developer, along with lots of hard work of course.

In my spare time, I enjoy travelling as every trip is a new exciting challenge.

## Work experience
